Dr. Wassim Ghannoum

Associate Professor, UTSA
Dept. of Civil &
Environmental Engineering

High-Strength Reinforcing Steel Developments in the United-States

Dr. Wassim Ghannoum is nationally and internationally recognized as an expert in the areas of analysis, design, and retrofitting of reinforced concrete (RC) structures, particularly structures subjected to large seismic demands and high damage states. Dr. Ghannoum's research and professional involvement focuses on extending the life-span and increasing the resilience to the damage of concrete structures through the application of novel structural materials and retrofit techniques.

Dr. Wassiam Ghannoum:

- Associate professor of Civil and Environmental Engineering at the University of Texas at San Antonio
- Specializes in the application of new polymer materials and high strength steel
- Published over twenty research related to reinforced concrete structures, non-conventional materials, and improved performance design
